PAY ITEMS

PAY ITEMS (Rideability, Stability, Durability)

QC/QA

Greater than 600 tons of Surface, or
Greater than 1000 tons of Base or
Intermediate

PAY ITEMS (Stability, Durability, Moisture)

HMA

- 400 ITEM
 - SUPERPAVE MIX DESIGN

PAY ITEMS

5 (5: Stability, 1: Durability)

- ESAL RANGE calculated from traffic and
percent trucks for each project
 - 1 Low Traffic
 - 5 High Traffic

PAY ITEMS

76 (76: Stability, 22: Cracking)

PG Binder 76 – 22 all binders are designed for project based on LTPP's SHRP Bind Computer Program

PAY ITEMS

SURFACE (Surface Friction)

Mixture Designation controlling surface aggregate type and quality of aggregates

PAY ITEMS

9.5 mm (Rideability)

Name of mixture

INDOT SPECIFICATIONS

- SPECIFICATION BOOK
- SUPPLEMENTAL SPECS
- SPECIAL PROVISIONS

CONTRACT DESIGN ISSUES

- Mix Design Method
 - SUPERPAVE (401)
- Binder Selection (Project)
 - PG Binder (902)
- Aggregate Selection
 - Fine Aggregate (904 / 904.02)
 - Coarse Aggregate (904 / 904.03)

VOLUMETRIC PROPERTIES

- AIR VOIDS
- VMA
- BINDER CONTENT
- DENSITY

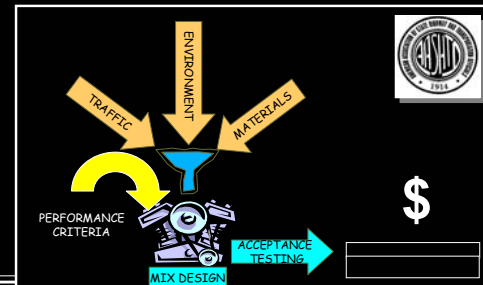

PLATE SAMPLE

Taking a Core Sample

VOLUMETRIC ACCEPTANCE

VOLUMETRIC ACCEPTANCE

- 10 % VMA
- 20 % Binder Content
- 35 % Air Voids Gyratory Compactor Samples
- 35 % Density

2003 QC/QA HMA

- Surface
 - 1,509,000 Tons/Mg
 - 2,514 Sublots
- Intermediate
 - 1,449,000 Tons/Mg
 - 1449 Sublots
- Base
 - 1,087,000 Tons/Mg
 - 1087 Sublots
- Total – 4,045,000 Tons/Mg

Referred to M & T

- VMA – 0
 - Binder Content – 0
 - Gyratory Low Voids – 34
 - Gyratory High Voids – 31*
 - Density – 16*
 - Total – 80
- * 1 Sublot referred for Voids & Density

Referred to M & T 80 / 5040

- 45 Sublots in Lot 1 (19,16,5,5)
- 12 Sublots in Lot 2 (7,3,1,1)
- 13 Sublots in Lot 3 (2,4,5,2)
- 7 Sublots in Lot 4 (2,2,2,1)
- 0 Sublots in Lot 5 (0,0,0,0)
- 2 Sublots in Lot 6 (1,0,1,0)
- 2 Sublots in Lot 7 (0,0,1,1)
